

IN THE DRAWINGS

Attached hereto are Figs. 1-3 which include in the header the phrase “REPLACEMENT SHEET.” The Figures have been amended to address issues raised by the Draftsperson’s Patent Drawing Review. In addition, Fig. 3 has been amended to re-insert the reference numeral 2 which was previously removed in error. No new matter has been added by these amendments.

REMARKS

The Examiner's issuance of a Notice of Allowance in the instant application is appreciated by the Applicant. The instant amendments to the specification and the drawings are intended to address the issues raised by the draftsman's review and an informality created by the amendment filed on March 30, 2006.

In the response filed on March 30, 2006, the numeral 2 was removed from Fig. 3. This was done in error. Instead, as done in this paper, the specification should have been amended to recite "a second liquid 2," which would have rendered the drawings and the specification in conformity with one another. As originally filed, the specification recited "a second liquid 3." Thus by this amendment the specification has been corrected, and the original numeral designations to the figures reinstated. No new matter has been added by these amendments.

CONCLUSION

Entry of the foregoing amendments in advance of the issuance of the patent in this matter is respectfully requested.

The Commissioner is authorized to charge any additional fee that may be required to Deposit Account No. 50-0320.

Respectfully submitted,

FROMMER LAWRENCE & HAUG LLP
